

SELF ADHERED AND FLUID APPLIED TRAINING COURSE

Dallas, TX

October 24-26, 2017 (2.5 days)

Deadline to Register: Monday, October 9th at 12:00 PM CDT

Interested in **ABAA Training?**

Self Adhered and Fluid Applied Training Course

This course includes instruction on everything from selecting proper materials, substrate preparation, application technology, troubleshooting, and hands-on training.

Not an Installer?

ABAA courses are open to everyone and are a great training opportunity for all, including General Contractors, Suppliers, Manufacturers sales rep, Architectural Reps, and anyone in the construction industry. There is NO experience needed to attend one of our great training courses.

Interested in Certification?

For certification purposes, a minimum of **3000** hours of work experience either directly with air barriers or in applicable related trade experience is required.

For companies seeking to become ABAA Accredited Contractor, it is ABAA policy that each company has at least

1 person trained in an ABAA Installer Training Course and at least **1** person trained in the Quality Assurance Program Administrator Course.

This can be the **same** individual.

Quality Assurance Program Administrator Course

The administrator course delivers an **overview** of the ABAA Quality Assurance Program, contractor and installer obligations, project reporting, as well as provides an introduction to air barriers, materials, building code requirements and more.

This course is **3** hours in length and is offered in the evening of the first day of installer training.

Our training courses have **limited spots**.

Testimonials

"I really feel that the course is sharpening my skills. I'm breaking old habits and building new confidence"

"We are thankful as a company to have taken this course, very helpful"

"Very well prepared, great course and would recommend to others"

"The hands-on training received from your organization is the best I've ever gotten"

"The course was very well taught and explanations were very detailed. Lots of valuable info on building codes and sciences, that I had no idea would have such a large effect on the performance of the building, and structural integrity of wall systems."
